

SIMPLE STEPS TO REDUCING CARBON EMISSIONS FROM HEALTHCARE

Distribution of CO₂-emissions from activities at Urology Clinic in Region Skåne, Sweden

47.8 Million

Disposable gloves used by this region alone each year

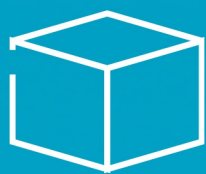

The amount of gloves wasted by falling to the floor.

In just two months at a Urology Clinic in Region Skåne:

1,446

Gloves wasted by falling to the floor

13

Packages of gloves wasted by falling

25kg

Of CO₂ equivalent emissions

Simple Step

A simple review process found that this wastage was because of the way that the gloves were packed - tightly into containers. When staff removed these gloves, others would fall to the floor.

The solution:

The packaging itself and the possibility to take gloves out one-by-one will be made requirements in the future procurement of gloves.
